Experience

2023 Oct - Present

Movmint Digital Fiat Works I Vancouver, Canada

Senior Software Engineer

- Movmint is the organization behind SandDollar, the world's first central bank digital currency, initiated by the Bahamas.
- Recruited by Techorin to work on the SandDollar Mobile Wallet App and Simple Cashier App.
- Led a team of two developers in enhancing the Mobile Wallet App, which had already been developed.
- Wrote comprehensive unit, widget, and integration tests to ensure code quality and reliability.
- Managed continuous integration and delivery (CI/CD) pipelines using CircleCI and Fastlane for automation.
- Implemented the Simple Cashier App, enabling stores and businesses to seamlessly accept payments from SandDollar users.

2021 Mar - 2023 Oct

Techcess Business Solutions I Colombo, Western, Sri Lanka

Senior Software Engineer

- Joined as a Software Engineer, leading a team focused on Flutter mobile development and API integration.
- Currently overseeing the development of a Super App that includes four native iOS and Android applications, with a backend built on pure PHP.
- Led the development of Lyceum SRP & Leaf Parent mobile app (Flutter) and Laravel-based APIs from the ground up, scaling to a user base of 13k.
- Spearheaded the development of Teacher and ERP mobile apps (Flutter) and corresponding REST APIs, working closely with my team.
- Played an active role in multiple projects, including the Lyceum Assessment project (Angular and Laravel), contributing to both initiation and resolving bottlenecks.
- Fully developed the Vishwa/WePay API and integrated the Paycorp/Sampath IPG into the mobile app.
- Managed various technical and non-technical challenges as the company was in its early growth stage, demonstrating adaptability in high-pressure situations.
- Worked collaboratively with key stakeholders including Lyceum and Sampath Bank, showcasing strong communication skills and the ability to quickly understand complex domains and functionalities with minimal guidance.
- Contributed to mobile development shortlisting processes and ranked as the second most productive developer at Techcess.

2021 Jan - 2021 Mar

Global Tote Lanka I Colombo, Western, Sri Lanka

Software Engineer

- Contributed to the development of a multi-client betting system mobile app using Flutter.
- Implemented biometric authentication with secure password encryption and decryption using AES.

Personal Info

Birth Date

04-04-1995

Industry experience

6 years

- 6y - Flutter dev
- 2y- API dev
- 3y - IOS native & Android native
- 1y - leading PHP, MySQL product

Programming experience

12 years

Started with

- Visual Basic (Grd 9, OL)
- HTML, CSS (Adobe Dream viewer) (Grd 9, OL)
- PHP, Javascript (2012 - Codecademy)
- Python, HTML, CSS, JS & MySQL (2012 - Codecademy, AL)
- Java (2013 onward)
- Joomla, Wordpress (2014)
- Android SDK (2015)
- Flutter (2018 - Before beta release)

Experienced with

- HTML, CSS, Javascript, JQuery, Ajax, and Bootstrap
- PHP, Python
- MySQL, SQLite, Realm
- Java, Kotlin, and Swift
- Typescript
- Angular, React JS, Vue (basic)
- Laravel, Codeigniter, Spring boot, Flask
- Android dev, IOS dev, Flutter mobile & web
- RESTful API, XML, JSON, Microservices
- Git, Github, Bitbucket, Gitlab, AWS S3
- Firebase technologies, Pusher
- Bash scription, Github actions & CI / CD
- JIRA, Slack, Teams

Learned & willing to learn

- R, C++
- C# with Unity
- Mongo DB, Realm, Postgress
- Ruby on Rails, Django
- AWS, Some Google services, Heroku
- Augmented reality (ARCore, ARKit)
- IOT (Raspberry pi, Arduino (basic))
- ML & DS (DL, NN, Tensorflow, Keras, Numpy, Matplotlib, Jupyter & etc)
- Blockchain (NFT, Solidity, Cryptocurrency)
- Trading bots (python, pine script, m5)
- PowerBI

- Facilitated communication between WebView and Flutter views through JavaScript channels.
- Integrated continuous integration and delivery (CI/CD) pipelines using Fastlane and Bitbucket.
- Enabled real-time communication within the app by integrating Pusher for live updates and user interactions.
- Additional details available on LinkedIn.

2020 Jul - 2020 Dec

DH3 Solutions I Colombo District, Western, Sri Lanka

Software Engineer

- Independently developed two Flutter applications and contributed to bug fixes and feature updates for native Android and iOS apps, including QR code functionality.
- Worked on QR ticketing, mobile wallet, and transportation bill payment applications for Singapore and Indonesia, using native Android (EFI, Adera), native iOS (EFI, Adera), and Flutter (SP Wallet, EFI newest) frameworks.
- Key technical achievements include:
 - Implemented biometric authentication (Face, Fingerprint, and PIN) for secure user access.
 - Developed QR code generation and scanning features.
 - Utilized Isolate for background task processing.
 - Integrated push notifications and in-app notifications using Firebase Cloud Messaging (FCM).
 - Integrated RESTful APIs for seamless backend communication.
 - Successfully implemented Stripe for payment processing.
- Additional details available on LinkedIn.

2019 Jan - 2020 Jul

Proitzen I Sydney, NSW

Associate Software Engineer

- Initially hired as a team member, but quickly promoted to Flutter Team Lead, mentoring and guiding six developers throughout their careers.
- Refactored and improved a complex codebase, enabling it to run efficiently in production with over 10k active users during my tenure.
- Developed and launched several apps, including Child Care and Elderly Care apps along with parent applications, and contributed to the development of iOS native mobile apps for teachers and management.
- Key technical achievements include:
 - Implemented S3 file upload and file download functionalities through platform channels for native Android and iOS.
 - Developed features for image, video, and audio recording, saving, and uploading, along with PDF and document management (saving and downloading) via platform channels.
 - Integrated WebView for HTML template display, managed WebView sizes, and handled HTML text display within Flutter widgets.
 - Set up push notifications using platform channels for both Android and iOS.
 - Utilized event and method channels to enable background services and tasks, particularly in 2018 when Flutter alone couldn't meet all industry-level requirements.
 - Implemented advanced UI/UX designs with animations and seamless user experiences.
 - Integrated RESTful APIs and handled various other technical tasks.
- Additional details available on LinkedIn.

2016-2022

Freelance developer

Android native mobile applications. Flutter & Dart mobile and web applications. Web frontend and backend applications (React, Angular, Laravel, Spring Boot, JSP & Servlet, HTML, CSS and Java Script Joomla, Wordpress)

- Trading Assistant (On going personal project, Laravel API, Flutter, AWS EC2 & RDS)
- LK Finder (Flutter Mobile).

- Public.lk mobile app (Flutter)
- Jas Express (Flutter mobile, Spring Boot Rest API, AWS EC2, and paypal payment)
- Electronic online store (Angular, Laravel API)
- Weda Gedara (Android Native Mobile, React Web with NodeJS Rest API)
- Vocab (Android Native, SQLite)
- StudyMate (Android Mobile, Firebase)
- Limbicare (Laravel)
- Unions maintenance app for Moratuwa University College (React, Node, Firebase functions)

○ Dev community participation

Flutter AWS S3 plugin, dropdown, Horizontal indicator package

AWS S3 file upload native android and IOS implementation with Flutter platform method channel in 2019 when there is no official S3 SDK for flutter.

Tried to ease out complicated official dropdown widget, packaged time consuming UI (Now there are many great options available). Among few other packages and plugins I have developed these are used by some developers.

Stackoverflow

Answered and posted faced issues with Flutter in much needed time.

Open source project participation

Flutter ecommerce Github project, Did some PRs for packages and plugins and raised flutter framework bugs in github issues.
